Shane.g.obrien@gmail.com | 386-405-9535 | [Linkedin](#) | [GitHub](#) | Open to Remote Work

Full-Stack Web Developer skilled in JavaScript, Node, and React, seamlessly blending music production expertise with web development. As a former live sound and studio engineer, I bring refined problem-solving and adaptability. Transitioning to web dev was motivated by a desire to infuse digital experiences with the creativity and dynamism of music. I excel in crafting responsive, scalable, and maintainable solutions. Passionate about staying ahead in tech, I seek a future where I pioneer innovative digital interactions, drawing inspiration from my unique journey and continuously embracing new technologies.

Technical Skills

HTML, CSS, Git, Figma, JavaScript, React.js, Node.js, Express.js, MongoDB.

Technical Projects

WTWR Weather App | [Frontend](#) | [Backend](#)

This app lets you upload your wardrobe and selects clothes for you to wear based on the current weather.

- Developed a responsive user interface using React.js
- Constructed a robust RESTful API using MongoDB and Express.js
- Hosted the application on Google Cloud
- Implemented frontend authentication features with React.js

Around the US app | [Frontend](#)

An Instagram like web application that allows users to share their photo content. This app is where I learned and applied foundation web development skills.

- Applied foundational web development skills, utilizing JavaScript, CSS3, and HTML5
- Implemented adaptive design principles
- Integrated third-party APIs

InDex | [Frontend](#)

A single page frontend application designed to showcase knowledge of working with 3rd party APIs and displaying data.

- Showcased proficiency in working with React.js and CSS3
- Successfully incorporated and displayed data from third-party APIs
- Utilized adaptive design techniques to optimize the application's layout

Experience

TripleTen by Yandex Web Developer Professional Training | January 2022 - October 2022

- Completed 750+ hours of coding in JavaScript, React.js, Node.js, HTML5, CSS3, BEM
- Implemented landing pages using a responsive mobile-first approach
- Developed dynamic MERN stack web applications from scratch
